<b>Examination Board</b>	<b>N/A</b>

The PSHEE course is delivered by the form tutor to the tutor group. The course covers aspects of health education, which includes work on personal relationships, sex education, emotional well-being and drug education. Units of work covering economic wellbeing and careers education are also part of this course.

Throughout the course pupils are encouraged to understand their experience through discussion of issues. The emphasis is on listening and talking rather than writing and learning factual information.
