What does the Project Management Apprenticeship Scheme include?

As a Project Management apprentice at BAE Systems you'll be responsible for supporting the successful delivery of different projects by gathering information about time, cost and quality constraints, identifying and analysing data trends and driving actions to their conclusion. You'll be using the latest project management tools to assist the project manager in keeping projects on track.

What will I be learning?

During a five year apprenticeship you will be responsible for supporting the successful delivery of different projects by gathering information about time, cost and quality constraints, identifying and analysing data trends and driving actions to their conclusion.

As well as spending time in the office, you'll also get out and about visiting key stakeholders in other buildings and locations.

You could join our team of highly skilled and dedicated employees who deliver end-to-end maritime services & support to more than 50 per cent of the Royal Navy's Surface Fleet and the Submarine Flotilla. Our range of services includes equipment and facilities management, training and product development and through-life support.

Whatever project you are assigned to, you will be the eyes and ears of a project, ensuring that it stays on track. You will maintain, update and report key project data, identify any potential issues as the project progresses and help make effective decisions to move the project along. As well as spending time in the office, you'll also get out and about visiting key stakeholders in other building and locations.

How much will I be paid?

Please see www.baesystems.com/apprentices for current salary information.

What qualifications will I get?

- QCF Level 6 Degree Apprenticeship
- BA or BSc Honours Degree in Project Management

What are my future job prospects?

Upon completion of the apprenticeship with BAE Systems, you will be reviewed against your performance and behaviours and the company will decide how to further your career.

You will have obtained a BA or BSc Honours Degree in Project Management, as well as having gained invaluable work experience.

The scheme will enable you to develop core transferable skills and open up a range of career opportunities. In particular the experience of project control is a great pre-requisite for more senior roles in project management.

There is no guarantee of a job at the end of the apprenticeship, however the aim is to transition you into a full time position at BAE Systems. You will have five years of work experience within BAE Systems and your degree, which puts you in a fantastic position. There will also be potential to work with our overseas customers.

Location

Placements will be held in Portsmouth, Frimley, New Malden and Cowes on the Isle of Wight.

BAE SYSTEMS

“There are so many different opportunities available and I’ve had lots of chances to try new things.”

Meet a fellow apprentice: Hebe

Background

Hi, I’m Hebe and I’m a Project Management Apprentice. I chose to join BAE Systems because of this scheme as it gives me the qualifications I need to progress in my career while gaining valuable work experience. I had previous work experience in the defence sector and loved it. With a passion for defence I knew BAE Systems was the place I needed to be.

The best part of the job

I’ve found the best part is the people you meet along the way that are always willing to offer their guidance and support. There are so many different opportunities available and I’ve had lots of chances to try new things.

How has the scheme helped you to develop?

It has helped me discover my strengths and given me the space to develop myself in areas I didn’t previously have experience.

What has this development lead to?

I’m now better at what I do and have the confidence to take on new challenges!

What would you say to people thinking about applying or following a similar path?

APPLY! BAE Systems provides that stepping stone between education and work while enabling you to do everything you want to achieve.
