

Edgbarrow School
Key Stage 5
1:1 LSA/QTS Support

Curriculum Intent

The aim of Sixth Form support is to provide students with an opportunity to develop their fundamental Maths and English skills as well as to develop their academic progress across the wider curriculum through independent and guided study.

Our intention is for students to consolidate learning so that they are able to retain knowledge in their long-term memory and be able to apply it in relevant contexts across the curriculum.

Our student's success will be recognised through increased confidence in their subjects. We also aim for students to have the key skills they require for all aspects of adulthood and engagement with the wider world.

- **What am I studying this year?**

Learning is specific to individual option choices.

- **When and how will I be assessed?**

Assessments will be delivered by individual departments.

- **Homework**

Homework is not set by the Progress Department. We support students to complete their homework for other curriculum areas through Curriculum Support lessons, 1:1'S and Homework Club.
